Search library collections and more!

The new Scholar OneSearch provides simple, one-stop searching for books, articles, digital media, and more. Local Northeastern collections and global resources can all be discovered through Scholar OneSearch, with many items available in full text online.

Scholar OneSearch also helps you manage your research. Use Scholar OneSearch to:

- View and renew current loans,
- Create lists and export citations to Refworks or Endnote, and
- Place interlibrary loan requests to order materials from other libraries.

Be sure to sign in with your myNEU credentials to view full search results—some databases, like Web of Science and EBSCOhost, only show results when you’re signed in.

What happened to NUCat?

Scholar OneSearch indexes all of the books, e-books, videos, journals, and other collections from our legacy catalog, NUCat, with the option to search and retrieve more, including articles, proceedings, and digital materials.

What’s your take?

Because this system is new to Northeastern, it will be enhanced over the summer and beyond as the library gathers user feedback. So we need to hear from you with any thoughts you have about Scholar OneSearch, or any problems you encounter.

Need help getting started? Not finding what you’re looking for?

Librarians can help you get started with your research and point you in the right direction if you’ve never used library resources before. Start here: library.northeastern.edu/ask

Choose your search scope
Use the drop down menu to choose between different search scopes:
- Library Catalogs + Articles searches all NU Libraries content and beyond, including books, articles, journals, media, and more.
- Library Catalogs searches print and electronic materials in local collections, except for articles.
- Law Library Catalog searches the NU Law Library’s holdings.
